

## COMMERCIAL FOOD EQUIPMENT PRODUCTS

Experienced Xymox design and product management teams are ready to work with you to design custom membrane switches that will meet the unique requirements of your commercial food equipment program. We offer a complete line of product features to provide you with the look, feel, and performance that meet your needs.

Whether it's choosing the right overlay material to withstand commercial cleaning solutions, an overlay that offers an anti-microbial surface, designing in ESD protection, using tactile domes for crisp snap and long life, integrating LEDs for functionality, or building a full assembly Xymox can help you design it right!

- US Engineering
- Stock membrane switches
- Touchscreens
- US and offshore production
- Custom membrane switches
- Rubber keypads
- Quick turn prototypes
- Capacitive switches
- Value added assemblies

### FRYMASTER HOLDING CABINET

#### APPLICATION

- Holdmaster HCP warming tray

#### DESIGN FEATURES

- Textured polyester overlay for durable surface
- Metal domes for tactile feedback
- Full assembly with indicator LEDs and 7 segment displays along with metal backplate and cable
- Locking connector to prevent disengagement during vibration

### ITW HOBART MEAT SLICER

#### APPLICATION

- Commercial meat slicer

#### DESIGN FEATURES

- Anti-microbial overlay surface
- Rim emboss keys to distinguish key locations
- Normally closed/momentary open shut off key for safety
- Fiber optic backlighting to highlight keys

### NU-VU OVEN/PROOFER

#### APPLICATION

- Commercial oven/proofer

#### DESIGN FEATURES

- Combination switch/overlay + logo decal for consistent look between the 2 parts
- Gradient pattern for unique look
- Textured surface to hide fingerprints
- Metal dome keys for firm tactile feedback
- Pillow emboss to distinguish key locations
